

12 Times Table Cubes

Cut out and make up the four cubes.

Children roll the cubes like dice.

If it lands with a number sentence facing upwards, children need to say the answer as quickly as they can. They then check the answer which will be on the bottom of the cube (the opposite face to the number sentence).

If it lands with an answer facing upwards, children need to say the corresponding number sentence as quickly as they can. They then check the number sentence which will be on the bottom of the cube (the opposite face to the answer).
